

# Discussion: Inspect Element & Debug CSS

---

Changes made with DevTools will go away on refresh

## 1. Inspect the box below and add your name to the blank!

Hello, My name is Sydney!

---

## 2. Edit the CSS and change the background-color to cyan

Try using the color picker

Let's learn about inspect element and CSS

---

## 3. I am not accessible. I should have the correct style. Can you fix me?

I am accessible!

---

**4. I wanted my font to be monospace, but for some reason I am not. Can you fix me?**

I am a typewriter!

---

**5. All elements are just boxes. Try changing some border, padding and margin using the box view in the Elements tab**

I need some space!

---

**6. Add a new CSS rule to make the links bold on hover**

1. [Link 1](#)
  2. [Link 2](#)
  3. [Link 3](#)
